

FLORENTINE

Lime-based wall coating

Description FLORENTINE FONDO is a fibre-reinforced white basecoat suitable for both internal and external decorations. With its depth of character it is perfect for creating a rustic textured effect for both old and new buildings. When used in conjunction with VIEROSIL VEL a matt colored glaze finish can be achieved which gives added prominence to the textures. The product is easy to apply and has high moisture transpiration properties combined with excellent resistance to water ingress.

Consumption rate 2,0 kg/m²

VIEROSIL VEL

Water repellent, acryl-siloxane matt glaze

Description VIEROSIL VEL is a water repellent matt glaze that can be applied universally over VIERO synthetic and mineral based products. It can be diluted up to 500% with water according to the desired color intensity and the porosity of the substrate. VIEROSIL VEL gives the surface a cloudy matt appearance without altering the breathability of the basecoat at the same time ensuring it remains impermeable to water.

Yield rate 13,0 - 15,0 m²/lt per coat
